

END-OF-LIFE (EOL) POLICY

09.10.2024

1. Introduction and Purpose

1.1. Purpose of the Policy

This policy is established by Jantsa to minimize the environmental impact of our wheel products at the end of their lifecycle. It outlines the procedures for effective waste management, recycling, and sustainable practices to achieve our sustainability goals.

1.2. Sustainability Goals

Jantsa is committed to environmental responsibility by adopting sustainable practices in our manufacturing processes. We aim to enhance the recyclability and reusability of our products, thereby reducing our ecological footprint and promoting a circular economy.

2. Scope

2.1. Covered Products

This policy applies to all steel wheel products manufactured by Jantsa and addresses their end-of-life management.

2.2. Stakeholders

The policy encompasses all stakeholders, including customers, suppliers, recycling partners, and other relevant parties involved in the lifecycle of our products.

3. Legal and Regulatory Framework

3.1. Compliance with Legislation

Jantsa adheres to national and international regulations concerning end-of-life product management, including directives such as the Waste Electrical and Electronic Equipment (WEEE) Directive and the End-of-Life Vehicles (ELV) Directive.

3.2. Environmental Regulations

Our manufacturing and recycling processes comply with applicable environmental regulations. Regular environmental impact assessments are conducted to ensure ongoing compliance and improvement.

4. Product Design and Development Approaches

4.1. Sustainable Design Principles

- Ease of Disassembly: Our products are designed for easy disassembly to facilitate recycling and component replacement.
- Recyclable Materials: Preference is given to steel and other recyclable materials to enhance the overall recyclability of our products.
- Modular Design: Products feature a modular structure, allowing for the replacement and reuse of worn or outdated components.

4.2. Material Selection

Materials are selected based on their environmental impact, focusing on sustainability and recyclability to minimize the ecological footprint of our products.

5. Collection and Recycling

5.1. Product Collection Processes

Jantsa has established designated procedures for the collection of end-of-life steel wheels. These points are communicated to customers to ensure easy and convenient access.

5.2. Recycling Partnerships

We collaborate with trusted recycling partners, to ensure that collected products are recycled responsibly and without harming the environment.

5.3. Recyclable Materials

Specific recycling methods are applied to steel and alloy materials to maintain high-quality recycled outputs. Rigorous quality control processes are in place to ensure

the integrity of recycled materials.

6. Responsibilities

6.1. Internal Departments

- Production: Ensure product designs and manufacturing processes adhere to sustainability principles.
- R&D: Develop new technologies and methods to enhance recycling and reuse capabilities.
- Sales and Marketing: Inform customers about the EOL policy and support recycling initiatives.
- Logistics: Manage the collection and transportation of products for recycling.

6.2. Supply Chain

Suppliers must comply with JANTSA's EOL policy, committing to sustainable material sourcing and environmentally responsible practices.

7. Customer and Stakeholder Communication

7.1. Information Dissemination

Customers are provided with clear and comprehensive information on how to recycle or dispose of products responsibly at the end of their lifecycle.

7.2. Education and Guidance

Regular training sessions and informational materials are offered to raise environmental awareness and guide stakeholders in adhering to sustainable practices.

8. Continuous Improvement

Jantisa is dedicated to regularly reviewing and updating the EOL policy to meet evolving sustainability goals. We integrate new technologies and best practices to enhance our environmental performance continually.
